GitHub : zoldyckl

Ifrane and Meknes, Fès-Meknès Region, Morocco

Core Competencies

- Full Stack Developer with extensive experience in building scalable web applications
- Introductory Machine Learning
- Relational Databases
- OOP, data structures, algorithm implementation

Projets

- Modern e-commerce website developed with React , TypeScript et Vite..
- Modern web application for maintenance management (full-stack app)
- Modern digital library platform with dashboard admin/users
- For more: johan-paradox.vercel.app

AYOUB LOULAJI

Profile

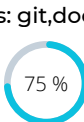

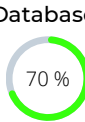

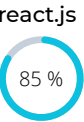

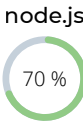

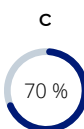

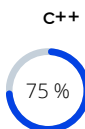

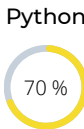

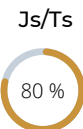

A 22yo motivated Software Engineer graduate with a strong academic foundation in software development, algorithms, and systems design. During my studies in Computer engineering, I developed practical skills in web development, C++/C, databases, and the software development lifecycle. I'm curious by nature, eager to learn new technologies, and enjoy solving real-world problems through code. I thrive in collaborative environments and am always ready to take on new challenges to grow as a developer.

Skills & Experiences

2023
(En cours)

Self development

I work as a front-end developer using React and related tools, full-stack tasks by integrating APIs and managing simple back-end functionality.
